

# **POPDELIMER DL**

## **Deliming Agent**

**CHEMICAL COMPOSITION :** Blend of organic and inorganic salts.

**APPEARANCE :** Coarse-grained powder

**pH of 1:10 soln. :** 2.0 – 2.5

### **PROPERTIES :**

**Popdelimer DL** is a granular white to yellowish powder which dissolves slowly, so no acid swelling must be feared.

**Popdelimer DL** acts quickly and very light and smooth pelts are obtained.

**Popdelimer DL** gives an even deliming effect and completely removes the lime and activates chrome-exhaustion during tanning.

### **APPLICATIONS:**

**Popdelimer DL** is added undiluted and may be used in normal floats.

Depending on the thickness and lime content of the pelts, 0.5 – 1.5% of **Popdelimer DL** can be used.

### **SHELF LIFE:**

Upto 1 years at temperatures between 5 and 40 °C and dry conditions.
