

# **POPSYNTH BTU**

## **Synthetic Fatliquor for all type of Skins**

- Chemical Character** : Blend of high molecular sulphoesters, quaternary ammonium salts and long chain alkanes.
- Appearance** : Light Brown viscous liquid
- Ionic Character** : Bionic
- pH of 10% solution** : 7.0-7.5
- stability** : Resistant to electrolytes, acids and salts in usual work concentrations.
- Dissolution** : Before adding to the floats, dilute with warm water until obtaining fluid consistency

### **PROPERTIES:**

**Popsynth BTU** imparts full and soft feel to the leather without over fatliquoring and gives very warm and pleasant feel to the leather surface. It also imparts good smoothness to the leather surface.

**Popsynth BTU** is an ideal fatliquor in the sense, besides giving uniform lubrication it also paves the way for the uniform distribution and absorption of the syntans, dyes and other chemicals which are added subsequently.

### **APPLICATION:**

**Popsynth BTU** is ideally suitable for light weight viz. nappas, gloving, clothing, garment and bag leathers. Its also recommended for glazed Kid goat uppers and all types of suedes.

### **STORAGE STABILITY:**

**Popsynth BTU** can be stored for about one year under normal conditions and temperatures. The product should always be stirred before use as a precautionary measure due to temperature changes.
