

POPSYNTH MQ

Synthetic, Light Fast Fatliquor

Chemical Character : Derivatives of Phosphoric Esters, sulphonated esters, triglycerides of high molecular weight and long chain alkanes.

Appearance : Amber colour viscous liquid

Ionic Character : Anionic

PH of 10% solution : 7.5-8.0

Stability : Resistant to electrolytes in usual work concentrations. Emulsion stability is excellent even in hard water.

Dissolution : Easily emulsifiable in hot or cold water

Fastness to light : Good

PROPERTIES:

Popsynth MQ is highly penetrative fatliquor which imparts excellent softness to leather. It also provides pleasant handle and smoothness to the leather surface.

Popsynth MQ imparts required degree of softness and fullness without making the grain loose.

Popsynth MQ is designed specially for the sophisticated class of leather which require soft feel with light weight.

APPLICATION:

Popsynth MQ is specially suitable for garment, nappa, nubuck, drymill, upholstery, softy upper, etc. as it gives excellent softness with light weight.

STORAGE STABILITY:

Popsynth MQ can be stored for about one year under normal conditions and temperatures. If affected by frost, the full content of the drum must be slightly heated and stirred intensively.
