

POPSYNTH MZC

Anionic fatliquor for all types of leather and furs.

Appearance	: Off White Pasty Liquid.
Chemical Type	: Synthetic Sulphited ester.
pH of 10% solution	: 6.0 (\pm 0.5)
Ionic Charge	: Anionic
Stability	: Stable in presence of electrolytes.

PROPERTIES & APPLICATIONS:

- **Popsynth MZC** gives extremely fine disperse emulsions capable of deep penetration into the leather. It has good emulsifying power.
- **Popsynth MZC** possesses excellent light fastness and has no effect on aniline dyes.
- **Popsynth MZC** makes leather uniformly soft, supple and stretchy.
- **Popsynth MZC** imparts glaze and sheen to suedes.
- **Popsynth MZC** is suitable for light fast white leathers.
- **Popsynth MZC** is a unique fatliquor for furs. It does not make hair (fur) greasy.
- **Popsynth MZC** can be used in pickle, tanning, retanning and fatliquoring for all types of skins and fur.

STORAGE :

Storage should be away from extreme conditions wherever possible. It is always advantageous to stir well before use.
