

POPTEX RS

(SOFTENER)

POPTEX RS is a softener with affinity for various fibers and imparts excellent drape and body.

PROPERTIES

- strong affinity for cotton, rayon, nylon, polyester, acrylic, wool and their blends.
- Imparts excellent drape and body at relatively low concentrations.
- Endows softness and body to fabrics similar to that achieved by silicone.
- Compatible with nonionics and cationics. Not compatible with anionic finishes.

FIELD OF APPLICATION

Substrate	cotton, rayon, nylon, polyester, acrylic, wool and their blends.
Machines	padding.
Operation	finishing.

CHARACTERISTICS

Type of product	amide derivative
Ionogenicity	cationic
Appearance	whitish
Consistency	pasty

APPLICATION

Dissolving Method	dissolved in small quantity of hot water (50 to 60 C) under constant stirring and then diluted to required concentration with hot or cold
Guide recipes	Water. 10 g/l of Poptex RS for cotton fabrics like voiles, poplins etc. 15 g/l of Poptex RS for Polyester and blends. 20-25 g/l of Poptex RS for georgettes and suitings.

SPECIAL REMARKS

Storage stability	approximately 12 months under normal conditions of storage.
