RECOMMENDATION :

During the leather production, there may be a risk of iron contamination. In order to prevent this, we suggest to use an iron-sequestering agent (0.2% on the reference weight), which may be added together with the first addition of tanning agents on the tanning or retanning processes.

STORAGE :

POP WATTLE EXTRACT SOLID maintains its characteristics unchanged if properly stored in dry premises protected from sunlight in closed bags.

PACKING :

POP WATTLE EXTRACT SOLID is presented in a powder form, dedusted, and packed in a 25Kg. bag net weight.
