

# **POPDELIMER AF**

## **( Nitrogen Free Deliming Agent)**

**CHEMICAL COMPOSITION:** Blend of organic and inorganic acids.  
(Does not contain ammonium salts)

**APPEARANCE** : Coarse-grained powder

**pH of 1:10 soln.** : 2.5-3.0

### **PROPERTIES :**

**Popdelimer AF** is a granular white to yellowish powder. The acids dissolve very slowly and so no acid swelling must be feared.

**Popdelimer AF** is based on nitrogen free raw materials and as no ammonia is brought in into the waste water by deliming it self.

**Popdelimer AF** gives very light pelts and leathers with fine grain.

**Popdelimer AF** gives an even deliming effect and completely removes the lime and activates chrome – exhaustion during tanning.

### **APPLICATIONS:**

**Popdelimer AF** is added undiluted and is used in normal floats but also in the so-called dry deliming. Depending on the thickness of the pelts and lime content of the pelts , 0.5 – 1.5% of **Popdelimer AF** can be used.

### **SHELF LIFE:**

Upto 1 year at temperatures between 5 and 40 °C and dry conditions.
