POPSYNTHOL SLP

Electrolyte & Acid stable synthetic fatliquor.

CHARACTERISTICS :

- Appearance : Light yellow viscous liquid.
Chemical Nature : Combination of synthetic oils with surface active agents.
Active Matter : 50% approx.
Ionic Charge : Anionic
Stability : Stable to all electrolytes, acids & syntans at usual concentrations.
Storage Stability : 12 months when properly stored.

PROPERTIES :

Popsynthol SLP generally improves the leather quality. This electrolyte stable product is used in the pickle and chrome tannage. Due to high amount of special emulsifiers, a pronounced wetting and levelling action can be achieved, thus giving a quicker and more even absorption and reaction of the pickling and tanning materials.

Popsynthol SLP gives an outstanding softening and lubricating effect.

Popsynthol SLP improves chrome uptake in rechroming without roughness of grain.

Popsynthol SLP can be emulsified in hot or cold water. Due to its good solubility it can be added directly to the drum without dilution.
