POPTAN F-90

(Organic Wet White Tanning Agent)

TYPICAL ANALYSIS :

Colour	: Milky White
Appearance	: Milky Liquid
pH (1:10 soln.)	: 5.0-6.0
Active Content	: 30%
Solubility	: Readily miscible with water

PROPERTIES:

Poptan F-90 is a pre-tanning agent, which supports further tanning by wet white, chrome and vegetable tanning agents.

Poptan F-90 helps to improve fineness of grain, without affecting the natural leather feel, touch and softness..

Poptan F-90 is free from formaldehyde unlike the conventional pre-tanning agents, so helps to maintain excellent light fastness even on ageing.

Poptan F-90 due to its chemical nature, helps in the dispersion of Dye, Syntan, Fatliquor and so helps to improve the fullness into the leather.

Poptan F-90 being amphoteric in nature, can be used in either stage of pre-tanning, tanning and retanning . It increases the shrinkage temperature of pickled pelts.

APPLICATION:

Poptan F-90 is used in production of upholstery, shoe upper, garment, nappa, automotive leathers etc.
