## POPTAN MM2

### FORMALDEHYDE FREE MELAMINE RESIN

#### TYPICAL ANALYSIS :

Chemical Type	:	Formaldehyde Free Melamine Resin, Aromatic Sulfonic acid condensate
Active Matter	:	96%
pH of 10% solution	:	8.0-9.0
Solubility	:	Readily soluble in water
Appearance	:	Pale cream free flowing powder

#### PROPERTIES :

Poptan MM2 is a spray dried, pale cream, completely formaldehyde free melamine resin which is used in the production of top quality leather and luxury articles).

Poptan MM2 precipitates under acid conditions and this precipitate, in combination with colloidal and other softening agents, has a selective filling action which improves the more open structured areas of the leather.

Poptan MM2 when used as a retannage for neutralised chrome stock results in a leather with a full feel, a tight flexible grain and uniform softness.

#### ADVANTAGES :

A tight and flat grain ideally suited to level dyeing and fatliquoring.

Improved richness and fullness where it is required most.

Excellent surface for past drying and subsequent buffing.

Produces uniformly soft leather without additional fatliquoring.

#### APPLICATIONS :

For the production of softy full grain, corrected grain upper leather and nubuck, 1-3% is recommended.

For the mild, filling retannage of all types of chrome leather, where fullness and suppleness are desired, 1-3% is recommended.

#### STORAGE :

Present no problem under normal storage conditions and has an indefinite shelf life. Some caking may occur if the product is stored in damp, warm conditions, but this does not detract from the efficiency of the product.

GSTIN NO: 03AAFFP6073K1Z4
