POPTAN WLE LIQUID

White replacement syntan.

POPTAN WLE LIQUID is mainly used as retanning for white chrome leather.

Nature : Phenol Condensation product.

ANALYTICAL DATA :

Concentration : 50%

pH (1:10 soln.) : 3.0-3.5

PROPERTIES:

POPTAN WLE LIQUID provides good, light fast white coverage on chrome leather and produces a fine, tight and smooth grain.

POPTAN WLE LIQUID renders good filling effect and brightens the colour considerably in dyeing of pastel and clear shades.

POPTAN WLE LIQUID when used in retannage of chrome leathers produces leather which has good buffing properties.

POPTAN WLE LIQUID is compatible with all synthetic and vegetable tannins and when used in vegetable tanning, it accelerates the penetration of vegetable tannins and brightens the colour of the resultant leather.

STORAGE :

Storage should be away from extreme conditions wherever possible. Under extreme climatic conditions this product may separate slightly. So it should always be well stirred immediately prior to use.
