## POPTAN WLXN

**POPTAN WLXN** is a replacement syntan, white and solid to light, mainly used for white chrome leather. It is formaldehyde free.

### CHEMICAL NATURE:

Phenol sulphonic acid condensate.

### ANALYTICAL DATA:

Concentration : 97%  
pH (1 : 10 soln) : 4.0

### PROPERTIES:

**POPTAN WLXN** is a light white coloured powder that when mixed with water it provides a slightly cloudy solution.

**POPTAN WLXN** is suitable for the pretanning and retanning of leather exempt from chrome for automotive and furniture upholstery.

**POPTAN WLXN** provides good light fast white coverage on chrome leather and produces a fine, tight and smooth grain.

**POPTAN WLXN** renders good filling effect and brightens the colour considerably in dyeing of pastel and clear shades.

As for the residual content of monomers, **POPTAN WLXN** complies with the current demands imposed by ecology.

Due to its good tanning effect, **POPTAN WLXN** is ideally suitable for the manufacture of wet white.

### STORAGE:

Presents no problem under normal storage conditions and has an indefinite shelf life. Some caking may occur if the product is stored in warm, damp conditions, but this does not affect the efficiency of the product.
