POPTARA POWDER N

POPTARA POWDER N is a modified pyragallol extract. **POPTARA POWDER N** gives firm and non elastic leathers having good resistance to light and water.

PHYSICAL & CHEMICAL PROPERTIES :

Appearance	:	Pale brown colour powder
pH (10% solution)	:	4.0 \pm 1.0
Solid content	:	93%
Tannin Content	:	60% \pm 2
Non Tannins	:	22% \pm 2
Moisture	:	5% \pm 1.0

CHARACTERISTICS :

POPTARA POWDER N is easily soluble in water.

POPTARA POWDER N has medium astringency which allows to obtain sole leather with a nice light colour without risk of crispation.

For sole lather, equipment leather and leather goods, we advice to use **POPTARA POWDER N** in the last additions of tanning extracts.

Lightfastness of leather tanned with **POPTARA POWDER N** is much better compared to the ones tanned with other tanning extracts such as Mimosa, POPQUEBRACHO, POPCHESTNUT.

POPTARA POWDER N is also recommended for buffed and grained leathers.

In retannage on chrome leather, **POPTARA POWDER N** gives uniform, strengthened, pastel shades.

APPLICATIONS :

POPTARA POWDER N is mainly used in :

- vegetable tanning of sole leather.
- vegetable tanning of leather goods.
- retanning of cow, boxcalf, goats.
- retanning of goats and kids for upper leather.

STORAGE :

POPTARA POWDER N maintains its characteristics unchanged if properly stored in dry premises protected from sunlight in closed bags.
